RECENT PROJECTS

TOYOTA.COM CLONE - HTTPS://GITHUB.COM/MURFFIOUS/PERSONAL-PROJECT
AngularJS, Node, SQL, Express-sessions (full stack application) : www.paulmurff.com

 - 'Build and Price' features of the site from partial clone of Toyota site

* Reverse engineered features like a Tacoma changing colors on color selection during build process. ' Your build' price and title, dynamic depending on selection of grade.
* SPA with 8 views using ui.router & ng-show /hide. Built in 2 week time frame. Voted Runner-up for overall "Best CSS Design" in my DevMountain cohort.
* RESTful api with Node pulling in data coming from 7 SQL tables. Used modular component based build using custom directives. Dynamic summary page with total $.

CHARMI DATING APP - HTTPS://GITHUB.COM/TEAM-OVERKILL/CHARMI-REACT
React/Redux, jQuery, Socket.io, Node, SQL : https://youtu.be/ZnkR-ij2TzU

Mobile phone web based dating app modeled after Tinder and Mutual

* Developed the browsing page/profile info page, used jQuery to allow for 'like' button to give user feedback on button selection and for opening/closing profile to see more.
* Lead developer on routing and planning out the app structure. Built the skeleton app.
* Solved difficult problems with JavaScript on front and back-end to enable routing params to change based on user interaction. Combined two objects from two api calls.
